## EDUCATION

**National University** **Expected 2027**
Bachelor of Science in Information Technology - Specialization in Mobile and Web Applications

## DESIGN & TECHNICAL SKILLS

**Languages:** Java, JavaScript, TypeScript, Dart, PHP, C#, SQL
**Frontend:** React, Tailwind CSS, Bootstrap, Flutter, .NET MAUI
**Backend:** Node.js, Firebase Cloud Functions, PHP, Laravel
**Database:** MySQL, Cloud Firestore, Firebase, Supabase
**Developer Tools:** Visual Studio Code, Visual Studio, Antigravity, Cursor, Postman, Git, GitHub
**DevOps & Cloud:** Firebase Hosting, Vercel, GitHub Actions, Cloud Functions
**Design & Prototyping:** Figma, Canva

## CERTIFICATIONS

**IT Specialist - Networking** | Certiport, a Pearson VUE business Verify Credential (Credly)

- Validated foundational networking knowledge and skills, including TCP/IP protocols, networking services, network topologies, and troubleshooting in wired and wireless environments.

**IC3 Digital Literacy Certification GS6 Level 1** | Certiport, a Pearson VUE business Verify Credential (Credly)

- Validated proficiency in computing fundamentals, key productivity applications, digital communications, collaboration workflows, and security practices in digital environments.

## PROJECTS

**iConstruct** | Flutter, React, Firebase, Cloud Functions, Gemini API (iconstruct-builder-app.web.app)

- Engineered Firebase Firestore data architecture and Cloud Functions for real-time product management, project data, bidding workflows, and automated notifications.
- Implemented an AI-powered Bill of Materials (BOM) generation system using Gemini API to assist builders with material planning based on project requirements.
- Integrated Firebase Cloud Messaging (FCM) to deliver automated notifications for project postings and shop bidding activities.

**NUTrade** | .NET MAUI, Firebase, Cloud Functions, PayMongo API, TypeScript

- Architected and developed a cross-platform mobile marketplace application tailored for National University Lipa students using .NET MAUI and Firebase.
- Engineered an automated backend payment pipeline using Node.js/TypeScript Cloud Functions and PayMongo QR Ph API to handle digital listing settlements and instant auto-publishing via webhooks.
- Designed a freemium monetization model featuring 1-hour periodic cached feed syncing, real-time peer-to-peer chat, and custom priority-pin listing upgrades.

**Cups & Cuddles** | PHP, MySQL, AJAX, PHPMailer, HTML, CSS, JavaScript

- Developed a web-based ordering and management system for a beverage business using PHP, MySQL, and AJAX.
- Implemented Email OTP verification via PHPMailer alongside product and menu management features, including item details, pricing, and availability.
- Engineered database-driven ordering functionality to streamline customer orders and administrative operations.
